

## 2019-2020 Refrigerator - Freezer Replacement & Disposal RFB # 2219 2

### Questions & Answers

**Question:** I am having trouble finding a unit for 1.3 21 cu ft ( $\geq 20.4$ ) white. I found a model that meets all requirements except the energy, it comes in at 430kWh. I have another option but it doesn't have the dual controls. My question is, what is more important? Dual control or energy rating.

**Answer:** Couleecap would recommend to bid the 430 kWh refrigerator option, since it is only slightly above our specification of 420 kWh or less, unless you can find a refrigerator that does meet all of the specifications. However, if we get another bid that meets all of the specifications, that bid may be given preference over yours.
